<b>KIWI</b>				<i>Indoor or outside . If container grown bring inside for fall harvest.</i>					
ACTINIDIA arguta 'ISSAI'	4-10	6-9	SELF FERTILE, HARDY KIWI	The only self-fertile hardy kiwi, is less vigorous than other kiwi's which enables it to be grown in gardens with limited space. This has been known to fruit in its first year. Blossom in Spring-fall fruiting. Bite sized 'fuzz' free fruit mature September-October. As a patio plant, requires support, set outside during the summer and move indoors in the winter.		1 Gal-6" on Bamboo	\$30.00	2 gal-8" on Bamboo	\$45.00

<b>PINEAPPLE</b>				<i>Ananas are easy to grow, drought tolerant plants. Although they are not very cold tolerant they can be overwintered indoors as a house plant. The plants will fruit in a container. All self-fertile.</i>					
ANANAS 'ELITE GOLD'	1-3	9-11	USUAL STORE VARIETY	Pineapple 'Elite Gold' produces a beautiful gold colour, both inside and out. This bromeliad is as lovely as it is useful. Forming a rosette of long, stiff leaves 3' feet tall and 3-4' wide. The leaves are a deep blue-green and very symmetrical. From the centre of the plant arise the flowers, with up to 200 light-purple to deep-red blooms held in a tall whorl. Eventually the flowers set berries, which join together to produce the fruit. It has a very high sugars-to-acids ratio, making it super-sweet and delicious. The fruit will generally ripen sometime between May and September.		1 Gal-6"	\$30.00		
ANANAS 'FLORIDA SPECIAL'	1-3	9-11	GOLDEN HIGH FLAVOURED FLESH SPINELESS	Bred for Florida pineapple production by Libby fruit company. Florida Special Pineapple produces a golden-fleshed fruit with great flavour. Ripening fruit has shown to take temperatures down to the mid 30's without internal damage. Leaves are spineless!		1 Gal-6"	\$30.00	2 gal-8"	\$50.00
ANANAS 'SUGARLOAF'	1-3	9-11	UNUSUALLY SWEET AND EDIBLE CORE 5-6lb FRUIT SERRATED LEAF	Like Eating Honey! Sometimes called White Sugarloaf or Kona Sugar Loaf, this pineapple variety has smooth leaves and an edible core! Fruit is white with a high sugar content but low acid.		1 Gal-6"	\$30.00	2 gal-8"	\$50.00
ANANAS 'WHITE JADE'	1-3	9-11	SWEETEST HAWAIIAN OUT THERE, 100% EDIBLE CORE SPINELESS	Most highly sought after Hawaiian variety. The white fleshed fruit is ultra sweet, with very low acidity. The core is 100% edible too! The beautiful blue grey leaves are spineless which makes handling much more enjoyable. Best suited for backyard container gardens. 'White Jade' will produce a tasty reward far better than anything found in the grocery store for those who plant them.		1 Gal-6"	\$30.00	2 gal-8"	\$50.00

<b>RED CUSTARD APPLE</b>					
Annona reticulata	20'X15'	30F	The red custard apple is a very close relative to the Sugar Apple and Atemoya. They have a thick creamy custard-like pulp that can be pink, red or white. The fruit have a pleasant flavour and aroma, and they are best eaten out of hand or in ice-cream.	3 Gallon-10"	\$70.00

<b>SUGAR APPLE</b>					
Annona squamosa 'THAI-LESSARD'	10' X 8'	28F	An exquisite fruit that is very closely related to the Cherimoya. The fruit are typically baseball- to softball-size, and they taste like sugary sweet custard. The pulp comes apart in segments, each containing a small black seed that separates easily from the fruit. The trees begin to fruit at just one to two years of age, and they can easily be maintained at eight to ten feet. Coloured green fruit weight (g/oz) 227-454/8-16. Aug-Nov	3 Gallon-10"	\$65.00
Annona squamosa 'NA DAI'	10' X 8'	28F	Known for it's lighter, greenish gray skin when ripe and it's consistent production. Sugar apple is primarily consumed fresh, as a dessert fruit. The pulp has an excellent flavour and may be incorporated into ice cream and milk shakes. The fruit contains some vitamin C and A. Fruit is also a good source of protein, riboflavin, and niacin.	3 Gallon-10"	\$65.00

<b>SOURSOP</b>					
Annona muricata	15' X 10'	40F	Soursop has a sweet and tart custard-like pulp. The fruit are typically heart shaped, and weigh up to ten pounds. They make superb milkshakes, but can be eaten fresh as well. The trees are fast growing, and they usually begin fruiting in just two years Year round	3 Gallon-10"	\$65.00

<b><u>ATEMOYA</u></b>		<i>Atemoya a cross between the lowland Sugar Apple and the highland Cherimoya. The fruit is fragrant and firm, and it has a snowy-white flesh of a fine texture. The pulp has fewer seeds than the sugar apple and the flesh is not divided into segments. The yield may be increased through hand pollination.</i>			
Annona squamosa x Annona cherimola 'GEFNER'	15' X 15'	27F		Hybrid Custard Apple Gefner is an Israeli cultivar with heavy cropping capacity. The flavour is very good. It is a productive, well known variety. It is most likely the best. It has good fruit production without hand-pollination.	3 Gallon-10" \$70.00
Annona squamosa x Annona cherimola 'PAGE'	15' X 15'	27F		One of the first named selections of Atemoya was Page, so-named by Roy Page of Coral Gables who took budwood from superior Atemoya trees on the property of Morrison Page in the Redlands. Fruit production of Page is good but fruit tends to split on the tree at maturity, so you may want to keep your eye on ripening fruit.	3 Gallon-10" \$70.00

<b><u>JAKFRUIT</u></b>		<i>Large by nature they can be pruned annually to 12' x 12' producing as much as 200 lbs. of fruit per year. It is the largest fruit that grows on a tree. The heaviest ever recorded weighed 275 lbs. Cooked green, the fruit can be used as a vegetable. It can be boiled, fried, grilled, roasted, or prepared with sauces. Mature seeds are also prepared in dishes. The ripe fruit tastes like a combination of mango, banana, pineapple, and cantaloupe. It is often compared to juicy fruit gum.</i>			
Artocarpus heterophyllus 'MAI 1'	8' X 6'	28F		This Thai variety has oval 25-35 lb fruit; the flesh is extra crispy with a golden-yellow skin colour, sweet and delicious, with little latex. The tree can be maintained at a height and spread of 8 ft.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'MAI 2'	8' X 6'	28F		Crunchy taste with little latex, fruit can weight between 20-40 lbs but this variety is not very productive as the Mai 1 as some growers have learned.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'BLACK GOLD'	8' X 6'	28F		Selected in Queensland, Australia. The tree is vigorous, with a dense and highly manageable canopy. With annual pruning the tree is easily maintained at a height and spread of 2 to 2.5 m (6.5 to 8.1 ft), with consistent, heavy production of 55 to 90 kg (120 to 200 lb) per tree. The fruit are medium-sized, averaging 6.7 kg (14.7 lb), with an edible flesh percentage of 35%. The exterior of the fruit is dark green and has sharp fleshy spines. The spines do not flatten, or "open" upon maturity, making it difficult to judge the proper harvest time and maturity. The deep orange flesh is soft, with a strong, sweet flavor and aroma. The flesh is easily removed from the fruit compared with other cultivars. Sept-Dec	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'CHEENA'	8' X 6'	28F		Cheena is a hybrid between Jackfruit and Cempedak. It is a moderate to heavy producer of small fruit that are easy to open and process. Low Vigour with spreading habit. Deep orange flesh is soft and melts in the mouth. The flavour is richer than normal Jackfruit.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'J-31'	8' X 6'	28F		Open, spreading, fast growth habit. Early season producer; tree easily pruned to maintain small tree (~8 ft). Deep yellow fruit that is firm. Sweet rich flavour, earthy aroma. Fruit rarely splits and has excellent texture. Fruit size 12kg [26lb]. Tree of 6-8' can produce 40-60kg per year.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'GOLD NUGGET'	8' X 6'	28F		Selected in Queensland, Australia. The tree is fast growing, with a distinctive dark green, rounded leaf. It forms a dense, spreading canopy, which is easily maintained at a height and spread of 2 to 2.5 m (6.5 to 8.1 ft). The fruit are small, green and rounded, with sharp, fleshy spines on the skin. The spines flatten to a smooth, golden-yellow upon maturity. The fruit weigh 3.2 kg (7 lb), with an excellent edible flesh percentage of 41%. The deep orange flesh is soft to medium firm depending on fruit ripeness. The flavour is excellent and the flesh has no fibre. Fruit may split open prior to ripening. Yields can be maintained at 60 to 80 kg (132 to 176 lb) per tree per year. Sept-Dec	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'GOLDEN PILLOW'	8' X 6'	28F		'Golden Pillow', or 'Mong Tong', was introduced to the Americas in the 1980s from Thailand. In its homeland it has attained a reputation as a fruit of distinctive beauty and quality. The tree is small and highly manageable with a height and spread of 3 m (10 ft). The fruit average 3.6 to 5.5 kg (8 to 12 lb) with 35 to 40% edible flesh. There are typically 65 to 75 seeds per fruit and little latex. The flesh is thick and crunchy, with a golden colour. The flavour is mild and sweet, with no musky aftertaste. This cultivar is noted for precocious fruiting, bearing in the second year after planting.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'ORANGE CRUSH'	8' X 6'	28F		Orange Crush has a dark orange, extra crunchy flesh, with a nice clean green skin, and low latex. Typically weighs about 20lbs. The interior of the fruit consists of large edible bulbs of yellow, sweet, banana-flavoured aromatic flesh that encloses a smooth seed.	3 Gallon-10" \$70.00
Artocarpus heterophyllus 'SMALL'	6' X 6'	28F		This variety features are described by its name: it has a smaller 8-10" fruit that weighs 4-6 pounds, and the tree has a dwarf habit. It is a perfect Jackfruit for container culture. The fruit is sweet and aromatic and has very little latex which makes it easy to handle when opening the fruit.	3 Gallon-10" \$70.00

<b><u>CARAMBOLA Star Fruit</u></b>		<i>Carambola are small symmetrical trees that fruit very prolifically. They are commonly eaten fresh, in salads, as garnishes and in drinks. The fruit have a sweet citrus-like flavour that is both delicious and refreshing.</i>			
Averrhoa carambola 'ARKIN'	8' X 6'	28F		Popular commercial variety, very heavy cropper of uniform very sweet juicy firm flesh with few seeds. Fruit 100mm in length with small wings and bright yellow skin. Aug-March	3 Gallon-10" \$65.00
Averrhoa carambola 'FWANG TUNG'	8' X 6'	28F		A Thai variety of carambola. Fruits are known for high quality & flavour. Known to be a productive tree, even at a smaller height. Star shape is profound with this cultivar. Aug-March	3 Gallon-10" \$65.00
Averrhoa carambola 'KARI'	8' X 6'	28F		A Hawaiian selection very similar to the Sri Kembangan but with fewer seeds. Aug-March	3 Gallon-10" \$65.00
Averrhoa carambola 'SRI KEMBAGAN'	8' X 6'	28F		A selection from Thailand that is compact with thick ribs and is orange-yellow in colour. Aug-March	3 Gallon-10" \$65.00

<b>TEA</b>		<i>All types of tea come from the same plants. Different rolling and drying techniques can be used with the same plant to produce both green and black tea. The plants are slow-growing and are best kept to a height of 4 ft., by pruning. Plant in well-draining soil in the sun or partial shade in a container.</i>				
Camellia sinensis <b>'LARGE LEAF'</b>	6'X5'	20		In the family of Camellia sinensis. Assamica which is native to India. This specific plant thrives in tropical areas and low lands.	3 Gallon-10"	\$45.00
Camellia sinensis <b>'SMALL LEAF'</b>	6'X5'	20		As the name describes, this plant has small size leaves (compared to red and large leaf), in the Camellia sinensis family which is native to China. Cold tolerant variety!	3 Gallon-10"	\$45.00
Camellia sinensis <b>'RED LEAF'</b>	6'X5'	20		This variety is a medium size leaf with a red hue on top of the leaf. Native to India.	3 Gallon-10"	\$45.00

<b>WHITE SAPOTE</b>		<i>A superb but delicate fruit that tastes like a creamy sugar cube. The fruit is typically baseball/softball size, and the trees begin fruiting in just one to two years. They are best eaten fresh and chilled, but are excellent in ice cream and milkshakes as well. They have a reputation for having a soporific effect, and have come to be known as the "sleepy sapote."</i>				
Casimiroa edulis <b>'HOMESTEAD'</b>	10'X8'	25F		This variety is native to Florida, has a creamy white flesh with good flavour. This variety does not leave a bitter after taste like the Younghans and the fruit can weight between 6-7 oz.	3 Gallon-10"	\$65.00
Casimiroa edulis <b>'REDLAND'</b>	10'X8'	25F		Redland White Sapote - produces medium size round fruit. Very creamy sweet custard-like flesh. July-Aug	3 Gallon-10"	\$65.00
Casimiroa edulis <b>'YOUNGHANS'</b>	10'X8'	25F		Best tasting. July-Aug Super Sweet variety, very large fruit, sweet and flavourful.	3 Gallon-10"	\$65.00

<b>CINNAMON</b>						
Cinnamomun zeylanicum	12'x15'	32F		An evergreen shrub or small tree with dark, leathery, aromatic leaves. In cultivation, young trees are cut back twice a year and sucker shoots develop from the roots. These long slender shoots furnish the bark that is the commercial product. The leaves are used in tea. Cinnamon is a very popular culinary spice and it is also used in candy, gum, incense, toothpaste and perfumes. The oil is used in medicine as a carminative, antiseptic, astringent and as the source of cinnamon extract.	3 Gallon-10"	\$60.00

**CITRUS**

<b>CLEMENTINE</b>						
'Fina Sodea'	12' X 15'	8-12		1925. Seedless fruit, small with dark orange-red colour. Juicy and flavourful. The tree is vigorous with dense foliage and produces a good crop of fruit which is still regarded as one of the best flavours.	2 Gal	\$70.00
'Nules'	6' x 8'	8-12		1953. Fruit is small-medium in size, reddish-orange in colour, juicy, sweet and aromatic. Harvested November to January. Tree is highly cold tolerant.	2 Gal	\$70.00

<b>GRAPEFRUIT</b>						
'Flame'	12' X 15'	8-12		Dark red seedless grapefruit. Peel is thin with a red blush. Fruit is sweet and juicy. Tree is large with a heavy canopy and bears in clusters.	2 Gal	\$70.00
'Marsh'	12' X 12"	8-12		1860 Seedless white grapefruit that is very juicy with good flavour. Fruit holds well to the tree and ships and stores well. It was the first seedless grapefruit variety used in Florida.	2 Gal	\$70.00
'Ray Ruby'	12' X 8'	8-12		Seedless red grapefruit that is slightly lighter than the Flame. The Ray Ruby holds its colour late into the season	2 Gal	\$70.00
'Rio Red'	20'X15'	8-12		1984. A popular red-fleshed fruit. Medium sized and picked while still green. Flesh and juice have a beautiful red colour. Loves high heat. Fruit stores on the tree well and has best flavour in spring and summer.	2 Gal	\$70.00
'Ruby Red'	20'X15'	8-12		1929. Dark pink seedless grapefruit that is juicy and flavourful. Peel has a slight pink blush. Flesh colour will fade somewhat later in the season. Tree is large and productive.	2 Gal	\$70.00

<b>PUMMELO</b>								
'Hirado Buntan'	20'X15'	8-12		A pink-fleshed pummelo. It has a marvellous chewy texture and a flavour much like grapefruit, sweet with no acidity and without a hint of bitterness, it is out of this world. Segments hold well together making it perfect for grilling or used in salads. Fruit ripens November to March. Self fertile.	2 Gal	\$70.00		
'Oroblanco' Hyb	20'X15'	8-12		1980. Mid winter, Triploid Oroblanco produces sweet seedless fruit even in areas of low summer heat. Huge, intensely fragrant flowers and attractive glossy foliage. The fruit has a smooth greenish-yellow rind, which is thicker than a typical Grapefruit. Holds well to the tree, stores well.	2 Gal	\$70.00	3 Gal	\$90.00
'Siamese Sweet'	8' X 6'	8-12		1930. Siamese Sweet is an acid-less, sweet-tasting pomelo. Oblate to broad ovoid; pulp white, with large, crisp, non-juicy sacs easily separating from each other; mild-flavoured but faintly bitter. Tree is a dwarf with drooping branches and hairy new growth.	2 Gal	\$70.00		

<b>HYBRID</b>						
'Sunquat'	3' X 3'	9-10		Lemon and kumquat hybrid. Fruit is large (for kumquat) with tropical flavour. Fruit has nice yellow colour and juicy. Tree is vigorous and productive, although thorny. Leaves are dark green and dense.	2 Gal	\$70.00
'Tavares' Limquat	8' X 6'	9-12		Persian Lime and kumquat hybrid. Fruit tastes like the lime but is smaller and more cold hardy. It is has an upright growth and very attractive. Does well in containers.	2 Gal	\$70.00
'Calamondin'	8' X 6'	9-12		Fruit very small, oblate to spherical; apex flattened or depressed. Rind colour orange to orange-red; very thin, smooth, and finely pitted, easily separable only at maturity; sweet/sour and edible. Segments about 9 and axis small and semi-hollow. Flesh orange-coloured; tender, juicy, and acid, used in marmalade's, jellies and drinks. Seeds few, small, plump, poly-embryonic, and with green cotyledons. Fruit holds on tree remarkably well. Tree of medium vigour, highly productive, upright and columnar, nearly thorn-less; leaves small, broadly oval, and mandarin-like. Strongly cold-resistant. Outstanding in containers.	2 Gal	\$70.00
'Nippon' Orangequat	8' X 6'	9-12		Satsuma and Meiwa kumquat hybrid. Fruit is large and very flavourful. Matures early and holds well to the tree.	2 Gal	\$70.00
'Nova'	8' X 6'	9-12		A Clementine and Orlando tangelo hybrid. Fruit is medium-large in size, easy peeling, good colour, pleasant flavour and juicy. Harvested November to December. Tree is dense with dark green leaves and somewhat up right in habit. Tree is cold tolerant.	2 Gal	\$70.00
<b>KUMQUAT</b>						
'Meiwa'	8' X 6'	9-12		Distinguished by their rounded versus oval shape and their sweetness. Often simply referred to as the sweet kumquat. Meiwa kumquats are entirely edible, rind, flesh and the occasional soft seeds. Meiwa kumquats have a thick, smooth oily peel with aromatic citron fragrances and sweet flavour. The fruit's flesh is not overly juicy but still very flavourful and tart. Only by eating both the skin and flesh will its perfect sweet-tart flavor balance be experienced. Harvest late winter through early spring. Meiwa in its native Chinese language translates to "golden orange".	2 Gal	\$70.00
'Nagami'	8' X 6'	9-12		Does very well as a containerize tree as well as planted out. Fruit is sweet with a little bit of tart.	2 Gal	\$70.00
'Cent. Var. Nagami'	8' X 6'	9-12		Cent. Variegated Nagami has a very showy leaf, small and variegated. Fruit is also variegated. Does very well as a containerize tree. Fruit is sweet with a little bit of tart.	2 Gal	\$70.00
<b>LEMON</b>						
'Baboon'	12' X 8'	8-12		A Brazilian lemon with very intense yellow rind and flesh. The flavour is acidic with almost a hint of lime. Tree is vigorous with large green leaves. Both tree and fruit are beautiful.	2 Gal	\$70.00
'Bearss'	12' X 8'	8-12		1952. Fruit closely resembles the Lisbon. Very juicy and has a high rind oil content. The leaves are a beautiful purple when first emerging, turning a nice dark green. Fruit is ready from June to December.		3 Gal \$90.00
'Harvey'	12' X 8'	8-12		1948. Having survived the disastrous deep freezes in Florida during the '60's and '70's. this varieties is known to withstand cold weather. Typical lemon shape and tart, juicy true lemon flavour. Fruit ripens in September to March. Self fertile.	2 Gal	\$70.00
'Lisbon'	12' X 8'	8-12		Fruit is very juicy and acidic. The leaves are dense and tree is very vigorous. This Lisbon is more cold tolerant than the Eureka and is more productive. It is one of the major varieties in California. Fruit is harvested from February to May.	2 Gal	\$70.00
'Meyer'	8' X 6'	9-12		1908. Considered ever-bearing, the blooms are very aromatic. It is a lemon and orange hybrid. It is very cold hardy. Fruit is round with a thin rind. Fruit is juicy and has a very nice flavour, with a low acidity. The aroma and flavour are distinctive and many find it especially desirable. Makes the best lemonade.	2 Gal	\$70.00
'Ponderosa'	8' X 6'	9-12		1887. Fragrant blooms produce extra large fruit. It is considered ever-bearing It's small habit makes it a good variety to espalier with. Fruit is moderately juicy and fairly acidic. It is more cold sensitive and requires protection. Fruits mature throughout the year, ever-flowering the new growth and flowers are purple tinged.	2 Gal	\$70.00
'Pink Var'	12' X 8'	8-12		Variegated leaves and fruit, this variety is very ornamental. The pulp is pink and juicy and nicely acidic. The fruit is harvested from November to May.	2 Gal	\$70.00
'Sanbokan Sweet'	8' X 6'	9-12		Fruit tastes like sweet lemonade! Sanbokan is a little know lemon. Fruit peels easily like a tangerine, the flesh is tender and sweet like a mix of sweet orange and grapefruit, Delicious! Sanbokan lemon tree has some cold tolerance. Fruit ripens November to March. Self fertile.	2 Gal	\$70.00
'Yuzu'	8' X 6'	9-12		A cross of the Ichang papeda Citrus cavaleriei and Sour mandarin Citrus sunki. However, its mostly lemon-like uses in the kitchen make a case for it being included here. The fragrant Yuzu lemon originates from China, but is mostly grown in Japan where both the juice and the grated rind are used in traditional Japanese cooking. The aroma is pungent and the dried peel is used as a spice. The fruit is used in a ritualistic New Year ceremony to ensure good health.	2 Gal	\$70.00
<b>LIME</b>						
'Australian Green Finger'	8' X 6'	9-12		Australian Finger Lime is also called the "caviar lime" is a thorny tree with small tear drop leaves. The peel is high in oil and very shiny. The Finger Lime does not prefer direct sunlight. Fruits fall/winter. Contained in the dark purple, 3" long fruit are a multitude of juicy capsules bursting with intense, sweet-tart, lemon-lime flavour. Found in the wild in Australia.	2 Gal	\$70.00
'Australian Red Finger'	8' X 6'	9-12		Australian Finger Lime is also called the "caviar lime" is a thorny tree with small tear drop leaves. The peel is high in oil and very shiny. The Finger Lime does not prefer direct sunlight. Fruits fall/winter. Contained in the dark Red, 3" long fruit are a multitude of juicy capsules bursting with intense, sweet-tart, lemon-lime flavour.	2 Gal	\$70.00

'Keylime' (Key Lime-Mexican)	8' X 6'	9-12		The colour varies from dark green when immature to a yellowish green when ripe. All green lime types turn fully yellow when mature and soon thereafter drop from the tree. To avoid confusion with lemons limes are collected when still green. The Mexican lime is at its juiciest and best medium ripe, when still partly green. If it is allowed to mature on the tree it loses some of its typical flavour and becomes less juicy. This is the Key lime of food recipes. Both the juice and the rind oil of Mexican lime have an inimitable and unique lime flavour.			3 Gal	\$90.00
'Mauritius' (Kaffir Lime)	8' X 6'	9-12		This is a wonderful lime variety, the leaves are used in Thai, Cambodian, Lao and Vietnamese cooking. They are very aromatic and shaped like a figure 8. Fruit is very bumpy and with little juice and is instrumental in making curry paste. The oil from the rind is also used in essential oils.	2 Gal	\$70.00		
'Persian'	8' X 6'	9-12		Fruit is medium in size and picked when still green. It has a very distinct lime smell. It is juicy and seedless. The tree has less thorns than the Keylime and is more cold tolerant.	2 Gal	\$70.00		
'Rangpur' Lime	8' X 6'	9-12		Tart reddish orange fruit is used like lime, although it is a sour Mandarin from India. The overlap of prolific fruit and purple tinged blooms make this a wonderful ornamental tree. Popular in mixed drinks or simply sliced for ice tea. December ripening.	2 Gal	\$70.00		
<b>ORANGE</b>								
'Early Gold'	12' X 8'	8-12		Medium sized fruit, with excellent colour and sweet flavour with few or no seeds. Peel is thin and adherent. Tree is vigorous and very productive. One of the best coloured of the early varieties.	2 Gal	\$70.00		
'Hamlin'	12' X 8'	8-12		Medium-small fruit with nice coloured flesh, very juicy, few to no seeds, thin rind. Tree is moderately vigorous, cold tolerant and very productive.	2 Gal	\$70.00		
'Midsweet'	12' X 8'	8-12		Medium sized fruit that is juicy, good colour, excellent flavour. Ripens the same time as the Gardner. Holds well to the tree. Tree is cold tolerant and less susceptible to preharvest fruit drop than Pineapple. Harvested January to March.	2 Gal	\$70.00		
'Ortanique'	12' X 8'	8-12		Fruit is large in size, that is bright yellowish-orange at maturity. Peel is thin, finely pitted, adherent, but peelable. Flesh is juicy, with a rich and distinctive flavour. It is a late mid-season and holds well to the tree without losing its internal quality. The tree is vigorous with a dense growth pattern.	2 Gal	\$70.00		
'Pineapple'	12' X 8'	8-12		Seedless type found 1932" Fruit medium-sized, spherical to slightly obovate; basal area sometimes depressed and radially furrowed; commonly with faint aureole ring. Well-coloured. Rind medium-thick; surface finely pitted and slightly pebbled. Flesh colour light orange; tender, juicy; flavour rich though sweet. Mid-season in maturity. Does not hold on tree. Tree moderately vigorous, medium-large, thorn-less, and highly productive. Named Pineapple because of its delicate fragrance.	2 Gal	\$70.00		
'Shiranui'	12' X 8'	8-12		Easy peeling, sweet and seedless. The fruit is medium-large in size, with firm flesh. It has a distinctive neck and the peel is a rich orange yellow colour. Flavour is a rich mandarin orange honey.	2 Gal	\$70.00		
'Temple'	12' X 8'	8-12		A Tangor, fruit is medium-large, juicy with rich, spicy flavour. Peel is adherent, but easily peeled. Tree has medium vigour and is a little sensitive to cold. Harvested January to February.	2 Gal	\$70.00		
'Cara Cara' Red Navel	12' X 8'	8-12		1976. Red Navel Fruit is typical for Navel, easy peeling, sweet and juicy, with red colouring Colour develops well in warm weather. Harvested November to February. Tree is compact and dense in growth habit.	2 Gal	\$70.00		
'Dream' Navel	12' X 8'	8-12		1939, Smallest of the navels, but with more colour quality and flavour. The fruit is medium sized, well coloured, rich flavor, juicy, seedless and sweet. The fruit holds well to the tree without losing its internal quality. Harvested from October to January.	2 Gal	\$70.00		
'Glen' Navel	12' X 8'	8-12		Fruit is large, seedless, easy peeling, juicy and flavourful. Very similar to the Washington Navel, although a little smaller and a little more heavier bearing. Tree is droopy with rounded top, medium in size and vigour	2 Gal	\$70.00	3 Gal	\$90.00
'Washington' Navel	12' X 8'	8-12		The large exceptionally delicious round seedless fruits are rich in flavour and have a slightly pebbled orange rind that is easily peeled. Early in maturity, 10 mths, at its best in the late autumn to winter months, but will hold on the tree for several months beyond maturity and stores well. The fruit was medium yellow and had a thick rind that came off easily. The segments are seedless, loose, very juicy and very sweet. The sugar to acid balance was on the sugary side but had enough acids to make a pleasing citrus flavour. The texture was firm but melting. All in all one of the best oranges to eat fresh.	2 Gal	\$70.00	3 Gal	\$90.00
'Sour'	12' X 8'	8-12		Sour Orange is known for its juice. It is used for marinating meats and making mojo sauce. Some prefer it in ice tea rather than lemon. The tree is cold hardy and a prolific bearer.	2 Gal	\$70.00		
'Moro Blood'	12' X 8'	8-12		Moro, in its turn, can have the most intense deep dark, almost purple-black flesh and juice of all blood oranges while it may not have even the slightest speck of pigmentation on the skin. Some say the colour of fully ripe Moro juice resembles the colour of the best wines from Burgundy. The skins of ripe full blood oranges can have as much anthocyanin as the skins of ripe dark grapes.	2 Gal	\$70.00		
<b>SATSUMA</b>								
'Brown Select'	8' X 6'	9-12		Tree is slow growing with an open growth habit. Very cold tolerant. Fruit is medium sized with orange flesh that is seedless, rich in flavour and juicy. Fruit does not hold well to tree, but does store well. Clip to harvest. Harvested November to December.	2 Gal	\$70.00		
'Kimbrough'	8' X 6'	9-12		Kimbrough trees are large, strong, spreading and very productive. The fruit is generally large and stores well on the tree after maturity. It has fewer seeds than other varieties of Satsuma. Easy peeling and excellent eating quality with superb flavour. Kimbrough is reported to be hardy down to 12F (-11 C) and is known to have survived single digit temperatures for a few hours. Season is November-December.	2 Gal	\$70.00		
'Xie Shan'	8' X 6'	9-12		Xie Shan is the Chinese translation of the original Japanese name 'Wakiyama'. It has a unique flavour and taste that differs from other Satsumas. With harvesting starting by mid-September Xie Shan together with 'Miyagawa' forms a new group of easy-peeling, completely seedless, super-early satsumas.	2 Gal	\$70.00	3 Gal	\$90.00

<b>TANGELO</b>						
'Wekiwa'	8' X 6'	9-12		1930`s. Wekiwa is a hybrid of Sampson Tangelo and a grapefruit and therefore should be called a tangelolo. It is delicious, very juicy sweet tropical flavour, of average size for mandarins. The tree is not vigorous but it is very productive and the fruit ripen in January. Under favourable conditions rind pink-blushed and flesh amber-pink. Early in maturity.	2 Gal	\$70.00
'White'	8' X 6'	9-12		This white tangelo is large in size, nearly seedless, ripens very early, is sweet and juicy.	2 Gal	\$70.00
'Fertic Temple'	8' X 6'	9-12		A Tangor, fruit is medium-large, juicy with rich, spicy flavour. Peel is adherent, but easily peeled. Tree has medium vigour and is a little sensitive to cold. Harvested January to February.	2 Gal	\$70.00
<b>TANGERINE</b>						
'Dancy'	8' X 6'	9-12		1867. Known as the Christmas Tangerine. Fruit are oblate to pear-shaped and of medium size. Peel is deep orange-red to red, smooth, glossy at first but lumpy and fluted later, thin, leathery and tough. Pulp dark-orange, of fine quality, richly flavoured. Tree is vigorous, upright and thorn-less Matures in late autumn and winter.	2 Gal	\$70.00
'Lee'	8' X 6'	9-12		Fruit is medium in size, slightly oblate to subglobose; basal area slightly raised and furrowed. Rind thin, leathery, moderately adherent but readily peel-able; surface smooth and glossy: colour deep yellowish-orange at maturity. Flesh colour orange; tender and melting; juice abundant; flavour rich and sweet. Seeds are numerous. Medium-early in maturity. Tree nearly thorn-less; dense foliage of medium-sized, lanceolate leaves.	2 Gal	\$70.00
'Murcott'	8' X 6'	9-12		1922. Because this fruit has such a thin peel, it is clipped from the tree rather than pulled. The glossy smooth rind clings to the pulp, but is still easily peeled when fresh. The tender flesh has twelve orange-coloured segments with numerous seeds, but there is an abundance of reddish-orange juice with a mango-like sweetness. Also called Florida Honey. Medium late, holds average on tree. Medium vigour, upright with long willow branches.	2 Gal	\$70.00
'Ponkan'	8' X 6'	9-12		Also called the Chinese Honey, it has large fruit with orange colour flesh, juicy, with mild pleasant flavour. Tree is vigorous with upright growth habit. Harvested December to January.	2 Gal	\$70.00
'Sunburst'	8' X 6'	9-12		A Robinson and Osceola hybrid. Fruit is medium in size, juicy and sweet with dark orange flesh. Peel is thin and brittle, but not hard to peel. Harvested November to December.	2 Gal	\$70.00
<b>SPECIAL</b>						
'Buddha's Hand'	8' X 6'	9-12		Buddha's Hand citron is a tree citrus with a deep lemon yellow colour when mature. The fruit morphs from small and purple, to green, and then yellow, splitting at the opposite end of the tree's stem forming segments that have a wild finger-like appearance. A fruit will have its own unique shape and can range in size, from a large lemon to a small melon. Buddha's Hand citron features an oily rind with a fragrant sweet lemon scent. Its flesh is void of juice, pulp, and seeds, and is inedible in its raw form. Buddha's Hand citron is commonly utilized for its zest and has a flavour that is described as a blend of bitter and sweet acidity. Harvest in late fall through early winter months. Current Facts Buddha's Hand citron, botanically known as Citrus medica variety sarcodactylis, is also commonly known as fingered citron. bushukan in Japan, and fo-shou in China. In China the Buddha's Hand citron symbolizes happiness and long life. In Japan, the Buddha's Hand citron is a favourite gift for New Years as it is believed to bestow good fortune on a household. Buddha's Hand contains no pulp or juice and is used for its fragrant zest.	2 Gal	\$70.00
'Ugli'	8' X 6'	9-12		Don't let its unassuming exterior fool you, because this mottled green citrus is truly delectable. Its size rivals that of a grapefruit, with a milder, much sweeter taste, fibrous sections inside and a slight protrusion at the base that looks like an "outie" navel. The Ugli fruit, however, was purportedly discovered in a Jamaican pasture in 1917. Now believed to be a natural cross between a mandarin orange and a grapefruit.	2 Gal	\$70.00

<b>LONGAN Dragon Eye Tree</b>						
<i>The Longan is a very close relative of the Lychee. The fruit are typically the size of a quarter, and they have a brown leathery shell that contains what looks like a peeled grape with a single seed. The fruit are sweet, with a pleasant aroma, and they taste like a nutty grape.</i>						
Dimocarpus longana 'BIEW KIEU'	10'X8'	26F		A variety from Thailand that is well suited to the subtropics as it requires cool winters to flower well. This variety is a consistent, heavy cropper with good quality fruits. July-Sept	3 Gallon-10"	\$70.00
Dimocarpus longana 'DIAMOND RIVER'	10'X8'	26F		A tropical Longan from Thailand, has more reliable production with tropical temperatures. It bears delicious fruit that is refreshing and musky sweet. It resembles an eyeball, as the flesh is translucent white, encasing a shiny black seed. The shell is papery brown and easy to peel when mature. The fruit needs to ripen on the tree, as it doesn't ripen further when picked. Aug-Sept.	3 Gallon-10"	\$70.00
Dimocarpus longana 'KOHALA'	10'X8'	26F		Large fruit with an aromatic sweet to spicy taste. Early season heavy cropping variety. Thrives in well-drained soil in full sun. Blooms Feb-April fruits July-Sept. The peel will be a deep tan, but the best ripeness indicator is pulp sweetness. Does not ripen after picking. Store in a plastic bag in the fridge for 5-7days.	3 Gallon-10"	\$70.00
Dimocarpus longana 'SRI CHOMPOO'	10'X8'	26F		Superior variety with pinkish fruit, it can be pruned to maintain a small tree size. This Lychee relative has stiffer leaves, more wind resistance and fruits more prolifically and regularly than its famous cousin. The flesh is sweet and is usually eaten fresh but can be canned or dried. The crisp skin is easy to remove and the white flesh has a texture and sweetness reminiscent of Litchi.	3 Gallon-10"	\$70.00

**COFFEE**

<b>COFFEA ARABICA</b>	6-15	9-11	<b>NOTHING FRESHER THAN HOME GROWN COFFEE</b>	Coffea Arabica is a species of Coffea originally indigenous to the forests of the southwestern highlands of Ethiopia. Arabian coffee has been cultivated for over 1,000 yrs. A small tree with characteristic horizontal branching, usually trimmed to take the form of a small shrub about 2m/6ft tall. Leaves are evergreen and usually shiny. Flowers are hermaphroditic and sweet-scented (resembles the aroma of Jasmine), the corolla white, tubular, normally with 5 lobes. Fruits are usually red but sometimes yellow or purple at maturity. The outer layer is soft, edible and a sweet-tasting cherry, the seed itself is pale fawn or brown (dark brown only after roasting). Best grown in rich, well-drained soils in filtered sun or light shade. Keep soils consistently moist but not soggy. Plants prefer climates with daytime temperatures of 70-80°F/21-26°C. and nighttime temperatures of 60-65°F/15-17°C. Leaf drop may occur when temperatures dip below 55°F/12°C. Plants may be grown indoors in containers with a fast-draining potting soil. Indoor plants like bright sunny windows, but when taken outdoors appreciate light shade. Plants first flower when they reach 3-4 years old. Fertilize during the growing season. There are several species of Coffea, the finest quality being Arabica. Coffea Arabica grows in tropical and equatorial regions where it is always spring or summer, it's not a change of climate, but rather the beginning of the rainy season after the dry season that triggers Arabica plants to flower. Eight or nine months after flowering comes the fruit. For Natural Coffee – fruit is dried in the sun for up to 20 days. Once the peels, pulp and seeds are all completely dry, then the beans can be separated for roasting.	1 Gal	\$35.00
-----------------------	------	------	---	---	-------	---------

**LOQUAT**

<b>Eriobotrya japonica</b>	15'X15'	22F		Shaped like Christmas trees, but they have large fuzzy leaves that are green on top and silver underneath. The fruit tastes like a combination of peach and apricot. They are most often eaten fresh, in jellies and in wines. The trees will begin fruiting at just one to two years of age. January-April	3 Gallon-10"	\$60.00
----------------------------	---------	-----	--	---	--------------	---------

**GRUMICHAMA BRAZILIAN CHERRY**

<b>Eugenia brasiliensis</b>	18' x 12'	30F		A small, compact tree that can be grown as a standard or shaped. The plants have beautiful, glossy, dark green leaves and rough, corky, textured bark. Fruit deep purple to black when ripe and they have a flavour very similar to that of Jaboticaba. They are most often eaten fresh and used in jelly.	3 Gallon-10"	\$60.00
-----------------------------	-----------	-----	--	--	--------------	---------

**PITOMBA**

<b>Eugenia luschnathiana</b>	10' X 10'	28F		Another highly ornamental Eugenia from Brazil. The fruit have an apricot flavour and colour. The trees can be container-grown. May-July	3 Gallon-10"	\$60.00
------------------------------	-----------	-----	--	---	--------------	---------

**STAR CHERRY**

<b>Eugenia selloi</b>	6' X 6'	32F		Ultra Rare Brazilian cherry, similar to the Surinam or Florida cherry but larger. The fruits have a delicious acidic sour-sweet flavour.	3 Gallon-10"	\$75.00
-----------------------	---------	-----	--	--	--------------	---------

**FIG [Ficus]**

Figs make a welcome addition to home container gardens and landscapes. They can be container grown as a tree or pruned and grown as a bush. They fruit on the current year's growth. This allows the plant to fruit even if it froze to the ground during winter months. These are all self-pollinating varieties. Fruit can be eaten out of hand, dried, baked, frozen, and used in preserves.

<b>'BEERS BLACK'</b>	4-12	6b-10	<b>SMALLER BLACK FRUIT, EXCELLENT FLAVOUR</b>	Medium sized with outstanding distinct sweet flavour, excellent either fresh or dried. A reddish pink interior and a violet skin. Rated to zone 7 and potentially to zone 6, so many homes can enjoy growing this cultivar outdoors year round.	1 Gal	\$30.00	2 gal	\$40.00
<b>'BLACK MISSION'</b>	4-10	7-11	<b>PREMIUM FIG, WONDERFUL FLAVOUR. 2 CROPS</b>	One of the most well known figs in cultivation (since 1769). It is known for its blackish-purple skin with a strawberry coloured centre. 'Black Mission' Fig has a wonderful flavour that is very distinct. These delicious high sugar figs are superb either fresh or dried. Also good for canning. 'Black Mission' produces a heavy first crop (breba) in early summer and then its main crop in Fall. This fig is a very vigorous grower.	1 Gal	\$30.00	2 gal	\$40.00
<b>'DESERT KING'</b>	4-8	7-10	<b>HIGH QUALITY, YELLOW SKINNED FRUITS JULY TO FALL</b>	A large, sweet, high quality delicious, greenish yellow fig with rich, reddish purple flesh. This San Pedro type cultivar has a very good breba crop (first crop), the second crop is not as good in quality as the first. The pulp is sweet and delicious either fresh or dried. This particular cultivar should not be pruned severely. This highly vigorous tree originated in Madera, California around 1920. One of the best for container growing.	1 Gal	\$30.00	2 gal	\$40.00
<b>'GE NERI'.</b>	6-10	7-9	<b>MAYBE THE LARGEST AND SWEETEST ITALIAN FIG</b>	Extremely large fruit, Purple skinned. Easy to grow. An Italian fig, add this rare variety to your collection and bring delicious, sweet flavour to your kitchen! Does not tolerate excessively wet soil, but needs ample moisture during fruiting.	1 Gal	\$30.00	2 gal	\$40.00

<b>'ISCHIA'</b>	4-10	7-11	<b>YELLOW SKINNED EXCELLENT FLAVOUR JULY AUGUST</b>	An excellent, medium sized, sweet, green to greenish yellow, thin skinned fig with red flesh that resembles a strawberry when peeled. These are especially attractive when used in a fruit salad. It is recommended for areas with short summers. This cultivar offers much to the home gardener. It is small in ultimate size, so even small yards can contain one without difficulty. It bears from mid-season till late in the season to extend the harvest and the quality is excellent. The figs possess a fine, excellent flavour either fresh or dried. Due to its fairly well closed, small eye, they are resistant to spoilage by either weather or insects. Originally from Spain, it makes a small tree when mature and is one of the best to grow in containers.	1 Gal	\$30.00	2 gal	\$40.00
<b>'LATTARULA'</b>	4-8	7-10	<b>ITALIAN HONEY FIG YELLOW SKIN 2 CROPS</b>	A very big, sweet, long bearing, lemon green fig with honey coloured flesh. It is excellent during dry harvest seasons but will have some spoilage during exceptionally wet or humid weather. It is very good dried or for eating fresh and when the fruit is "right", it is unsurpassed! Produces an abundance of fruit twice a year. A great selection for container culture too.	1 Gal	\$30.00	Available end of June	
<b>'OLYMPIAN'</b>	4-8	6-10	<b>VERY SWEET, THIN SKINNED PURPLE FRUIT</b>	Won the Retailers' Choice Award at the 2014 Far-West Show! 'Olympian' is a ultra cold hardy fig & absolutely delicious. This fig produces very sweet fruits with thin purple skin with a red to violet flesh. A unique heirloom variety, good size for container growing. If pruning is necessary, do after harvest.	1 Gal	\$30.00	Available end of June	
<b>'TEXAS EVERBEARING'</b>	4-10	7-11	<b>LARGE SWEET AND NEARLY SEEDLESS</b>	Everything is bigger in Texas, so they say. This Fig follows that by producing a good, large, (sometimes 2" in diameter) sweet, brownish yellow, bell shaped fig with a long fruiting season. The flesh is strawberry coloured, nearly seedless and delicious. It bears at an early age and gives a good crop even in cool, short summers. The second crop matures early and is even heavier than the first. The tree is very hardy and even if frozen to the ground, it will usually bear on the new sprouts that same year. Stays shorter in containers, a great feature for patio edibles.	1 Gal	\$30.00	2 gal	\$40.00
<b>'WHITE MARSEILLES'</b>	4-10	7-11	<b>YELLOW WHITE FRUIT. THOMAS JEFFERSON'S FAVOURITE FIG</b>	A fairly hardy, large, lemon coloured, thin skinned fig with tender, white to light amber flesh. They are very sweet and have a high sugar content. An old, (pre 1769) reliable variety, this fig is excellent in all respects and a favourite of Thomas Jefferson. Produces a small breba crop. They will split if watered too much while ripe. This slow growing, dense tree is well adapted to containers.	1 Gal	\$30.00	2 gal	\$40.00
<b>'VIOLET DE BORDEAUX'</b>	3-5	6-10	<b>DELIGHTFULLY SWEET PURPLE FRUIT TWICE A YEAR</b>	Discovered about 1680 in Versailles (thought to be originally from Spain) this hardy cultivar produces large, almost black fruit with very deep red pulp. The flavour is rich and delightfully sweet. Producing two crops per year; breba fruit are pyriform with thick, tapering necks, the main crop fruit are spherical often without necks. Excellent fresh or dried but probably needs heat to develop the best flavour. This dwarf and prolific cultivar is considered by some to be the very best tasting fig around.	1 Gal	\$30.00	2 gal	\$40.00

**STAR ANISE**

<b>Illicium Verum</b>	16 x 9	7-10		A medium-sized evergreen tree native to northeast Vietnam and southwest China. A spice commonly called star anise, star anise seed, Chinese star anise or badiam that closely resembles anise in flavour is obtained from the star-shaped pericarp of the fruit. Within its area of natural distribution, there are two flowering and fruiting seasons annually. First flowering occurs in June with fruit maturing in May/June the following year. Another flowering follows shortly after the first with mature fruits produced in October-November the following year. Flowering starts at the age of 5-6 yrs. Seed production usually begins when the tree is 9-10 years old and continues for about 80 years. Good fruit crops are usually encountered every three years. Flowers large, bisexual, 1-1.5 cm in diameter, white-pink to red or greenish-yellow, axillary and solitary. Ideal Mean annual temperature: 12-18°C. Prefers high light but tolerates shade when young. It should not be planted in soils generated from limestone; pH 4-6 and minimum humus content 2%.	3 Gal	\$45.00		
-----------------------	--------	------	--	--	-------	---------	--	--

**ENGLISH WALNUTS**

<b>JULGANS regia CARPATHIAN</b>	50-60	5-10	<b>THIN SHELLLED WITH HIGH QUALITY FULL BODIED FLAVOUR</b>	A close relative of Black Walnut, the English Walnut is also known as Carpathian and Persian. Originally from ancient Persia most seedlings were brought to North America by European Settlers, When fully dormant they are just as hardy as Black Walnuts and have survived -40'. Fluctuating Spring temperatures with a late Spring frost can cause damage. Preferred for their high quality, full bodied flavour and thin shells.	2 Gal	\$40.00		
---------------------------------	-------	------	--	--	-------	---------	--	--

**BAY LEAF**

<b>Laurus nobilis</b>	12' X 8'	27F		A culinary herb often used to flavour soups, stews, braises and pâtés in Mediterranean cuisine. The fresh leaves are very mild and don't develop their full flavour until several weeks after picking and drying. Bay leaves can also be crushed (or ground) before cooking. Crushed bay leaves impart more of their desired fragrance than whole leaves, and there is less chance of biting into a leaf directly.	3 Gal	\$45.00		
-----------------------	----------	-----	--	--	-------	---------	--	--

**LYCHEE**

<b>Litchi chinensis 'BREWSTER'</b>	10'X8'	26F		One of the most extensively planted commercial varieties in Florida. The fruit is large, deep red, and of excellent eating quality. A vigorous upright grower and like many Lychee it tends to be an alternate bearer producing good crops every two out of three years. June-July	3 Gallon-10"	\$70.00		
------------------------------------	--------	-----	--	--	--------------	---------	--	--

Litchi chinensis 'EMPEROR'	10'X8'	26F		Emperor' is the largest of the Lychee fruits achieving golf ball size, and it often produces aborted "chicken tongue" seeds. The tree is a slow compact grower that produces every three out of four years, it is not a mainstream commercial variety.	3 Gallon-10"	\$70.00
Litchi chinensis 'MAURITIUS'	10'X8'	26F		Originating in southern China, but it is named for the island off the southeast coast of Africa where extensive commercial plantings have been in production for decades. It is a regular and heavy producer. The fruit is sweet, pink to red, and produces chicken tongue seeds in about one out of ten fruit. June-July	3 Gallon-10"	\$70.00
Litchi chinensis 'SWEETHEART'	10'X8'	26F		Hands down the finest Lychee. It is a consistent producer of huge heart shaped fruit all having chicken tongue seeds. Production is close to that of Mauritius inspiring growers targeting high-end produce markets and gourmet restaurants. It is quickly becoming the choice by home garden growers for its reliability and superior quality. June-July	3 Gallon-10"	\$70.00

**BARBADOS CHERRY**

Malpighia punicifolia	12'X12'	28F	Acerola	The Barbados Cherry is a fast growing bushy tree that can be trained as a standard or shaped as a hedge. The fruit are sweet to sub-acid, and they are used extensively in juices throughout Latin America. The cherries are extremely high in vitamin C, and just one has the equivalent vitamin C content of 12 oranges combined. They are also used in jellies, jams, and they freeze without losing their vitamin C content.	3 Gallon-10"	\$60.00
-----------------------	---------	-----	---------	--	--------------	---------

**MANGO**

Mangifera indica 'ALAMPUR BANESHAN'	15' X 15'	27F		Considered one of the finest dessert Mango of northern India. This mid season bearer is another "condo mango" variety that can be maintained at a height of just ten feet. The fruit are oblong with a green skin and distinctive corky dots that cover the fruit's surface even when ripe. They are best harvested mature green and ripened at room temperature like the Mallika. The fruit typically weigh about 1 lb and ripen June to July. Flavour-4, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'ALPHONSO'	15'X15'	27F		A traditional Indian mango renowned for it's rich flavour and smooth texture. When ripe the skin is greenish yellow to yellow and pulp is deep orange and highly aromatic. The trees tolerate abundant rain and high humidity very well which is somewhat unusual for traditional Indian types. This makes the tree a good producer of high quality fruit typically weighing 0.5-0.75 lbs, ripening in late June to July. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'CARRIE'	8'X6'	27F		A fibre-less Florida cultivar that is sickening sweet and delicious as can be. Its compact size makes it an excellent patio tree that requires minimal care. Both fruit and tree have little to no problem with fungus or disease. Lack of colour and firmness are the only shortcomings of this superb variety. The fruit ripens from June to July. Flavour-5, Tree size-5.	3 Gallon-10"	\$65.00
Mangifera indica 'CHOC-ANON'	15'X15'	27F		Also known as the miracle mango, a Thai mango that fruits in the winter and often fruits in the summer of the same year producing two crops annually. The fruit are typically 0.75-1.0 lbs. and have a golden yellow skin when ripe. The pulp is sweet and firm with little to no objectionable fibre. The trees are vigorous growers with a densely foliated canopy and upright habit. This variety is an excellent choice for growers that want to extend their mango season beyond the traditional summer months. The fruit ripens from November-January and sometimes July as well. Flavour-3, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'COGSHALL'	8'X6'	27F		An ultra compact grower that produces sweet fibreless fruit. The tree is suitable for container growing as it can easily be maintained at eight feet tall, and will still produce a good size crop year after year. The fruit ripens June to July. Flavour-4, Tree size-5.	3 Gallon-10"	\$65.00
Mangifera indica 'FAIRCHILD'	10' X 8'	27F		A fibreless Panamanian selection of excellent eating quality. The flesh is firm, juicy, and aromatic. The fruit itself is small and pale yellow, but the tree has attributes that make up for the less than stellar appearance. With very little effort the tree can be maintained at a height of ten feet and grown in a container. Dubbed a "condo mango" because it is conducive to being grown in a container. The fruit ripens June to July. Flavour-4, Tree size-5.	3 Gallon-10"	\$65.00
Mangifera indica 'FLORIGON'	15'X15'	27F		A fibreless, disease resistant, early season cultivar that is extremely popular for its quality, consistency, and precocity. The flesh is firm with a deep yellow colour and mild flavour. The fruit ripens from late May-July. Flavour-4, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'GLENN'	15'X15'	27F		A Haden seedling, the fruit has a mild peachy flavour which is both sweet and delicious. It is of excellent eating quality, consistent production, and effortless to grow. The fruit ripens June to July. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'GOLD NUGGET'	15'X15'	27F		An excellent virtually fibreless Florida mango. First and foremost extremely prolific, second, it fruits later in the year, making it one of the most sought after late season Mango's. Finally, it has excellent harvesting and handling characteristics. The tree itself is a large vigorous grower with an open canopy. The fruit ripens late July to August. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
Mangifera indica 'ICE CREAM'	6'X5'	27F		Easily be maintained at a height of just six feet making it ideal for container growing. Although the fruit is not exactly dessert to the eyes the flavour is sweet, rich, and reminiscent of mango sorbet. In the Dominican Republic the fruit skin turns a canary yellow colour. This is due to the tropical yet arid conditions of their mango growing regions. The fruit ripens from June to July. Flavour-4, Tree size-5.	3 Gallon-10"	\$65.00
Mangifera indica 'LANCETILLA'	10' X 8'	27F		A Honduran selection made famous by Dr. Richard Campbell. Its debut at the 2001 international mango festival at Fairchild tropical botanical gardens made it an instant south Florida sensation. Its immediate acceptance by homeowners can be attributed to the tree's ability to be maintained at just ten feet. The five pound blood-red fruit is firm, sweet, and completely fibreless. The fruit ripens from mid August to September. Flavour-4, Tree size-5.	3 Gallon-10"	\$65.00

<b>Mangifera indica 'MALLIKA'</b>	6'X5'	27F		Native to India it has become a favourite due to its superb flavour, unparalleled disease resistance, and small but extremely productive habit. The catch, however is the fruit must be picked mature green for optimum flavour, packed in a cardboard box and kept at room temperature. Ripening typically takes ten to fourteen days. Ripens from June to July. Flavour-5, Tree size-5.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'NAM DOC MAI'</b>	8'X6'	27F		A premium Thai cultivar that is hands down the most sought after of the Asian Mango's The fruit is firm, sweet, aromatic and completely fibreless, and is born on a tree suitable for container growing. The fruit ripens from June to July. Flavour-5, Tree size-5.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'OKRUNG'</b>	15'X15'	27F		An excellent Thai cultivar. The fruit is traditionally served in Thailand in combination with sticky rice. The tree is a medium sized erect grower that holds the fruit from June to August. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'PICKERING'</b>	8'X6'	27F		Has everything for those with limited space. They naturally have a bushy, compact growth habit, and can be maintained in a container at just six feet. The fruit has a firm flesh with a fantastic coconut/mango flavour and no objectionable fibre. They are typically 0.75-1.5 lbs, and they ripen in June. Flavour-5, Tree size-5.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'PYU KALAY'</b>	15'X15'	27F		A unique Asian mango from Myanmar (formerly Burma). The large, vigorous tree produces small, yellow, elongated and somewhat pointed fruit with a bright lemon-yellow, moist, spicy flesh. Commercially it has been dubbed the "lemon meringue" mango for its aroma. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'VALENCIA PRIDE'</b>	15'X15'	27F		A Haden seedling, the flesh is sweet, aromatic, firm, and fibreless with an exceptionally attractive fruit. It has one of the finest flavours of all of the late season varieties and it never disappoints. The fruit ripens July to August. Flavour-5, Tree size-4.	3 Gallon-10"	\$65.00
<b>Mangifera indica 'VAN DYKE'</b>	15'X15'	27F		An eye-catching Florida cultivar that enjoys wide acceptance throughout Europe. The fibreless fruit has a rich sweet flavour that is also spicy. Its excellent disease resistance is complemented by exceptional colour. The fruit ripens July to August. Flavour-3, Tree size-4.	3 Gallon-10"	\$65.00

<b>SAPODILLA</b>						
<b>Manilkara zapota 'ALANO'</b>	15'X15'	29F		An oval-shaped fruit native to Thailand, and it is arguably the finest Sapodilla in the world. The fruit is super sweet and the texture is that of an ultra fine pear. The trees are regular heavy producers of medium sized fruit typically weighing about nine ounces. In addition to the fruit's superior quality, the tree tends to be less brittle and have a much smaller habit than other cultivars. The fruit ripens from November to June.	3 Gallon-10"	\$70.00
<b>Manilkara zapota 'MAKOK'</b>	8' X 6'	30F		Long and pointed, and one of the best-tasting in the world. It is native to Thailand, and a relatively recent introduction. It is an excellent variety for homeowners, because the tree is a small, compact grower perfect for limited spaces. The pulp is smooth and brown, with a sweet aroma. It ripens from May to November.	3 Gallon-10"	\$70.00
<b>Manilkara zapota 'MOLIX'</b>	15'X15'	29F		A football shaped fruit native to Mexico. The tree has curly leaves. The pulp is exceptionally sweet, with a fine pear-like texture and pleasant aroma. The fruit are large, typically weighing thirteen ounces. Fruit ripens beginning in February and ending in May.	3 Gallon-10"	\$70.00

<b>MULBERRY</b>							
<b>MORUS 'NIGRA', dwarf</b>	2-6	5-11	EVERBEARING SWEET MEDIUM SIZED FRUIT FOR CONTAINERS	Easy-to-grow, this abundant producer of sweet and luscious medium-sized fruit has performed exceptionally well in pots yielding several crops per year even during the first season. It is best to pick the fruit ripe, as it does not ripen after picking. When not devoured fresh they are ideal in jams, wine and pies. If grown in pots, they are continuous producers cycling in and out of flower and fruit when given warm temperatures and adequate light. They can be kept under 2' with moderate pruning. In the ground, they turn into a large bush. Mulberries are known for their immune system enhancing benefits. They are also thought to improve eyesight. Also they are disease-and-insect resistant.	1 Gal	\$30.00	Available end of June

<b>BANANAS</b>								
Musa, or bananas as they are commonly known, come in a wide array of choices: dessert, cooking/plantains, ornamental foliage, and ornamental flowering. Bananas are suitable for all climates given the appropriate care. Bananas are heavy drinkers and feeders. They perform great in a container and can be grown in a greenhouse or shade house very quickly! Broad, long, graceful leaves and rapid growth-commonly reaching full size in just a few weeks-make banana a favourite plant for providing a tropical look to pool and patio areas. The development of bananas following a frost-free winter is a source of both pride and amazement to those unfamiliar with banana culture. The first hands to appear contain female flowers which will develop into bananas (usually seedless in edible types). The number of hands of female flowers varies from a few to more than 10, after which numerous hands of sterile flowers appear and shed in succession, followed by numerous hands of male flowers which also shed. Pests and Diseases: Musa have few troublesome pests or diseases outside the tropics. Care; After fruiting, the mother plant which bore should be cut off near ground level, as it can never produce again. Use the remains in a mulch bed or compost heap. After a major cold period in which there is no doubt that bananas were killed to the ground, cut the plants off at ground level within a couple of weeks of the freeze. Most bananas will produce the flower bud within 10 to 15 months of emergence as a new sucker. depending mostly on variety and extent of cool/cold weather. These off shoots will form a new rhizome thus creating a new plant.								
<b>MUSA 'DWARF GREEN' [Cavendish]</b>	6-8	9-11	CREAMY ORANGE PULP FRUIT	Musa 'Dwarf Green' is a sturdy plant with extremely thick leaves, which may be used for wrapping and grilling meat, as well as serving food. They also make this cultivar very wind tolerant. This is a Cavendish type banana that produces a creamy orange pulp fruit.	3 Gallon-10"	\$50.00	5 Gallon-15"	\$75.00
<b>MUSA 'DWARF IHOLENA' [Cavendish]</b>	6-8	9-11	RARE WITH WONDERFUL TASTE-CREAMY ORANGE PULP FRUIT	Rare with a wonderful taste, Musa 'Dwarf Iholena' is a sturdy plant with extremely thick leaves, which are used for wrapping and grilling meat, as well as serving food. They also make this cultivar very wind tolerant. A Cavendish type banana that produces a creamy orange pulp fruit.	5 Gallon-15"	\$75.00	8 Gallon-15" with handles	\$90.00

Musa 'Dwf NAM WAH' [Lady Finger]	10' X 10'	8-11		Also known as 'Pisang Awak' and other names through out the world, this group of lady finger bananas produce large sized bunches of sweet delicious fruit that is prized in Indonesia areas as well as the U.S. Somewhat sensitive to Panama disease (fusarium wilt). 8-10ft	3 Gallon-10"	\$50.00		
MUSA 'DWARF ORINOCO' [Cavendish]	5-6	7b-11	SUITABLE FOR DESERT OR COOKING	The 'Dwarf Orinoco' is a small vigorous plant that is solid green and has a thick stem. It is a heavy bearer of thick skinned fruit of very good eating quality. There is very little curvature to the fruit and the fruit can ripen on the plant without splitting. 'Dwarf Orinoco' versatility make them popular in many regions of the world. The plant is hardy and withstands cold temperatures and wind, but may be supported when carrying large heads of fruit.	5 Gallon-15"	\$75.00	8 Gallon-15" with handles	\$90.00
MUSA 'GRAN NAIN' [Cavendish]	6-8	8-11	40-60lbs	A very attractive, solid green banana up to 6 feet tall that is the producer of the famed delicious "Chiquita" bananas. These choice, very large heads of edible fruit are seedless and of the highest quality, taste is sweeter when picked ripe from the plant vs, green from the store. It is a quick ripening variety that is borne in racemes weighing 40-60lbs (20-25kgs) each. Exhibits superb wind and disease resistance.			15 Gallon-18" with handles	\$120.00
Musa 'HUA MOA' [Plantain]	10' X 10'	8-11		A tall Banana-Plantain cross from Hawaii, grows to 10-15 ft tall. Produces small to medium bunches of very plump, roundish fruits with golden-yellow skin and pinkish yellow-orange flesh. Very sweet flavour. May be eaten fresh or cooked.	3 Gallon-10"	\$50.00		
Musa 'ICE CREAM' [Blue Java]	10' X 10'	8-11		The 'Ice Cream' banana is highly regarded as one of the best tasting. This banana has slight hints of vanilla ice cream flavour and a creamy texture. Also know by the name 'Blue Java' in some parts of the world because of the blueish-green skinned fruit. 10-12ft	3 Gallon-10"	\$50.00		
MUSA 'LACATAN' [Burro]	5-9	8-11	CLAIMED TO BE THE BEST TASTING BANANA.	Desirable for desert bananas because of their sweet taste, aroma, and firm texture when ripe. They are preferred to Cavendish varieties in their native region of the Philippines. Claimed to be the best tasting banana. Harvest fruit in 8 to 12 months.	5 Gallon-15"	\$75.00		
MUSA 'MAHOI' [Cavendish]	6-8	8-11	2+HEADS SWEET FRUIT	Musa Double Mahoi is a Dwarf plant that grows from about 5 to 7 feet tall. A very rare and unusual plant that produces two large heads of fruit on the same plant and can occasionally produce a third head of fruit. Fruit is highly rated, very tasty and sweet, considered AAA+. Mahoi means twins in Hawaiian. Makes a great house or patio plant.	3 Gallon-10"	\$50.00		
Musa 'MANZANO' [Apple Banana]	10' X 10'	8-11		Or "Apple Banana", a seedless diploid that is rendered so by bearing sterile female flowers. It is not produced commercially on large scale but it is usually grown in backyards for family consumption. Its sub-acid flavour is reminiscent of a cross between an apple and a very sweet banana, which make a pleasing combination. It must be allowed to ripen fully before eating. The plant is quite cold hardy and will not be harmed by temperatures that are close to freezing. If frost forms on its leaves they will turn brown. 12 to 14 feet tall and mostly green coloured with just a light margin of red around the leaf	3 Gallon-10"	\$50.00		

**JABOTICABA**

Myrciaria cauliflora	15'X12'	27F		A small bushy tree that has multiple ornate stems. The fruit are grape-like, with a thick skin and melting pulp. They are eaten as fresh fruit, in jams and in wine. They can be frozen whole, to enjoy throughout the year. Because the fruit occurs on the old growth, it is best never to prune them. They are cold, hardy plants, and they like a lot of water. Winter-Spring	3 Gallon-10"	\$65.00		
----------------------	---------	-----	--	---	--------------	---------	--	--

**OLIVE**

OLEA europaea 'ARBEQUINA'	2-8	7-9	3-4' CONTAINER GROWN TREE SHOULD HAVE 300+ OLIVES PER YEAR	Bring a taste of the Mediterranean to your home. This variety is revered as both a table olive – for its mild, buttery and lightly fruity flavour – as well as an oil olive for one of the highest concentrations of healthy, antioxidant-rich oils. Even a small tree can produce 20lbs (8kgs) of Olives. Tasty fruit and gorgeous gray-green foliage will evoke the rolling Spanish landscapes where this variety is widely grown. Olives hang well on the tree and ripen at different intervals. Drought and Heat tolerant and pest-resistant. Ripens starting in November. Self-pollinating, but bears better when cross pollinated by Manzanillo. Can be kept smaller by pruning. Plant these warm-weather plants in containers so that you can move them indoors before freezing temperatures arrive. Semi-deciduous, meaning they will drop leaves in extreme cold. Need 200-300 chill hrs (below 50°F 10°C) for best fruiting.	1 Gal	\$30.00		
OLEA europaea 'MANZANILLO' 4-032.	5-8	8-11	SMALLER PITS. RANKED AS THE BEST TABLE OLIVE.	Imported from Spain in the late 1800s it produces quality black edible fruit annually. A great table and oil olive, high in anti-oxidants with smaller pits, yielding more flesh. 'Manzanillo' is ranked as the world's best table olive. This small spreading evergreen tree is a vigorous and prolific fruiter. The soft, gray-green foliage has small, pollen-rich white flowers that grow on long stems from the leaf axis. Although it's self-fertile, cross-pollination with Arbequina will increase yields. The medium/large-sized (about 1") fruits are often picked green but will ripen to deep black when left on the tree. Although pruning keeps trees at the desired height, remember that olives usually bear fruit on the previous year's growth. Bring your olive tree inside once temperatures reach 32°F/0°C and provide cool, but not freezing, temperatures with indirect light for the winter months. Remember: olives must be cured before eating. Grow as a Patio Plant or House Plant! Makes a very unusual bonsai! Need 200 chill hrs (below 50°F 10°C) for best fruiting.			2 gal	\$55.00

**PASSION FRUIT**

Passion fruit grow on a fast growing vine that climbs with tendrils. The flowers are large, showy, and extremely aromatic. They are also excellent butterfly attractants. The pulp is used extensively in fruit juice drinks like Hawaiian punch, and it is often used in baked desserts as well.

<b>PASSIFLORA edulis 'POSSUM PURPLE'</b>	12-12	9-11	FRUIT THE SIZE OF A GOOSE EGG	This amazing passion flower not only produces delicious, sweet purple fruit about the size of a Goose egg, it also has attractive frilly-edged flowers that Passiflora are known for. It is self-pollinating with fruit appearing effortlessly and will fruit in a 10" pot. A strong vigorous grower that with a little encouragement makes a fine hanging basket. Periodically just wrap the wandering vines around the basket and in no time fruit will be dangling from the dark green leaves. Give full sun for best performance. Aug-Nov.	1 Gal on Bamboo	\$30.00	3 Gallon-10" on Trellis	\$60.00
<b>Passiflora edulis 'SWEET SUNRISE'</b>	12'X12'	32F		Yellow Passion Fruit, delicious baseball sized fruit, flavour is appealing, musky, guava-like, acid. Great for drinks. Self pollinating. Aug-Nov	3 Gallon-10" on Trellis	\$60.00		
<b>Passiflora edulis 'QUADRANGULARIS'</b>	20'X15'	32F		Giant green to yellow passion fruit reaching over one foot in diameter. Pulp is not as flavourful as the common Passion fruit, but still tasty and often eaten or used in drinks. The largest species of Passion fruit in the world. Their pendulous flowers are very large and showy, as well as fragrant, which is very sweet and strong, and carries on the breeze. You can smell them from across the garden. There is not any trick to growing this vine, protect it from cold as frost will kill it. It can be grown in a container (as large as possible for roots to run as it will not flower or fruit as well in a smaller container). The alternate leaves are ovate, 3 1/4" to 6" wide, and 6" to 8" long. The solitary, fragrant flowers, up to 5" wide, have 5 sepals and 5, 2" long, petals that are reddish-pink; the corona filaments are purple-and-white below, blue in the middle and white at the tip. The pleasingly aromatic, melon-sized fruit is longitudinally lobed; has a thin, pale green, rind which is often blushed with pink and edible. Lightly sweet with the texture resembling a dry pear. Underneath that, is a layer of firm, mealy, white flesh, 1" to 1 1/2" thick, with a mild and sweet flavour. The central cavity is filled with juice and sweet-acid pulp, enclosing oval, dark brown seeds.	3 Gallon-10" on Trellis	\$60.00		

**PEPPER**

<b>'PIPER NIGRUM' BLACK PEPPER VINE</b>	10-15	12	SLOW GROWING INDOOR EVERGREEN VINE. SPICY HOME GROWN PEPPER.	Black pepper is a perennial evergreen flowering vine. Once the main stem is established it grows many side shoots to create a bushy column. The plants form short roots, called adventitious roots, which connect to surrounding supports. Leaves are almond-shaped, tapering towards the tip, dark green and shiny above, paler green below, arranged alternately on the stems. Florets are mainly hermaphrodite, tiny, apetalous that bloom on flowering stalks known as spikes. 50-150 whitish to yellow-green flowers are produced on a spike. Fruits or corns round, berry-like, up to 6 mm in diameter, green at first but turning red as they ripen, each containing a single seed. 50-60 fruits are borne on each spike. Fruits are picked when green and immature to produce green pepper; when fully grown but still green and shiny to produce black pepper (dried for about 3 days); and when slightly riper (red) to produce white pepper (for which the fruits are also soaked to remove the fleshy outer layer). It is best grown in sun dappled areas or areas with bright indirect sun. It needs a support structure (e.g., wooden frame or prop tree). Outside of conservatories or greenhouses, they may be grown in containers as a houseplant with an attached trellis or in a hanging basket. Containers can be taken outside for the warm summer months, as indoor houseplants will not usually produce fruit. Plants are intolerant of temperatures below 50°F/10°C. This species is native to southern India and Sri Lanka. It has been used in Indian cooking since at least 2000 B. C.	1 Gal on Bamboo	\$40.00

**ROSS SAPOTE**

<b>Pouteria sp.</b>	20'X15'	28F		The Ross Sapote is a selection of Canistel like fruit introduced to Florida by William F. Whitman. It is unclear if it is simply a variety or a distinct species. Like the Canistel, the plant is evergreen, open and well adapted to sub-tropical climates. The fruit grows more in clusters and is smaller and rounder than the larger selections of Canistel. It has a thin orange-yellow skin with a moist flesh that resembles the yolk of a hard-boiled egg. They are commonly eaten fresh out of hand and in ice cream. Even those who are not fond of Canistel, immediately like Ross Sapote. Sept-March	3 Gallon-10"	\$60.00		
---------------------	---------	-----	--	--	--------------	---------	--	--

**GUAVA**

<b>Psidium guajava 'RUBY SUPREME'</b>	15'X12'	26F		'Ruby Supreme' has 2-4" fruits that turn yellow when ripe. The inner flesh is highly aromatic, sweet and pink. It can be eaten fresh or made into jelly or juice. For optimum sweetness, let the fruit fully ripen on the tree when the skin yields slightly to the touch. 'Ruby Supreme' flowers and fruits year-round.	3 Gallon-10"	\$55.00		
<b>Psidium guajava 'THAI WHITE'</b>	15'X12'	26F		The size of Thai Guava Fruit would be generally of a softball with apple green skin that can range from bumpy to smooth. The flesh is white with pale yellow seeds and tends to be drier than the pink type of guavas. Thai guavas are only mildly sweet and have very little fragrance. The crunchy flesh and hard seeds are both edible. Thai White guavas are high in vitamin C and are quickly becoming known for their health benefits.	3 Gallon-10"	\$55.00		

**POMEGRANATE**

<b>PUNICA 'PARFYANKA'</b>	4-8	7-10	A SEMI-DWARF VARIETY THAT GROWS LARGE AND DELECTABLY DELICIOUS FRUIT WITH A SOFT SEED.	Originally imported from Dr. Gregory Levin at the Garrigala agricultural station in Turkmenistan. The fruit is quite large and highly coloured in beautiful bright red. The arils are large and bright red with a very small, soft, edible seed. The fruit is of the highest quality. 100 to 200 chill hours. Self fertile. Also called Parfianka and Garnet Sash. Zone 7 - 9. (warm 6 perhaps).	1 Gal	\$30.00		
---------------------------	-----	------	--	--	-------	---------	--	--

<b>PUNICA 'SALAVATSKI'</b>	4-8	6-9	<b>COLD HARDY RUSSIAN VARIETY, LARGE DELICIOUS FRUIT SELF FERTILE</b>	A deciduous, most cold-hardy pomegranate tree. Produces beautiful red flowers in summer and large orange skinned with red arils delicious fruits in early fall. - perfect for juice, tea, and even desserts • self-pollinating and dwarf-sized, so you don't need much space. One of the healthiest fruits you can grow! Now, you can grow an endless supply of sweet super-food! The Toughest Pomegranate Variety, it has survived temperatures to -6F or -21C. It is native to the extremely cold regions of Russia/Afghanistan. Can be container grown indoors. Requires 200 chill hours.	1 Gal	\$30.00
--------------------------------	-----	-----	---	--	-------	---------

**SUGAR CANE**

<b>SACCHARUM 'OFFICINARUM'</b>	8-12	9-10	<b>EDIBLE, THE REAL CANDY CANE!!</b>	Saccharum 'officinarum', is a large tufted perennial grass that is probably native to Southeast Asia. It can grow to 15-20' tall in it's native environment, but to 5-8' tall more commonly when grown indoors. Stems contain a sweet juice that may be extracted for production of sugar or molasses.	1 Gal	\$40.00	<b>Available end of June</b>
------------------------------------	------	------	--	--	-------	---------	----------------------------------

**JUNE PLUM**

<b>Spondias Dolcis</b>	8'X6'	28F		The dwarf Ambarella is a fast growing plant that will produce fruit in less than one year, and at a height of only two feet. They are often eaten fresh, or made into drinks and jellies that taste something like apple butter. They have a single sharp, rather large, spiny seed.	3 Gallon-10"	\$55.00
------------------------	-------	-----	--	--	--------------	---------

**CHOCOLATE TREE**

<b>Theobroma 'CACAO'</b>	15'X15'	32F		This beautiful tree has large, dark green leaves that shade the fruit pods which grow directly from the trunk and branches. The flesh is eaten as a dessert, and the seeds are the raw material of commercial chocolate. Hot chocolate can be made by drying, roasting and grinding the seeds, and then adding milk. Chocolate "beans" were used as money by the Maya Indians of Central America. The red pods are typically larger and have more abundant flesh.	3 Gallon-10"	\$60.00
--------------------------	---------	-----	--	---	--------------	---------

**GINGER**

<b>Zingiber 'OFFICINALE'</b>	2-4	8-11	<b>EDIBLE GINGER ROOT</b>	This is a great selection of edible yellow ginger root that produces rhizomes quickly. These rhizomes can be dug as soon 4-6 months in ground or from a container. Store bought ginger root is mature, fibrous , & extra spicy. "Baby Ginger", which is harvested juvenile, is becoming more and more popular in the culinary arts. It is more mild, tender & does not need to be peeled. The shelf life is about 1-2 weeks at room temperature. This makes it an ideal plant to have in the home garden/container, where it can be harvested fresh as needed.	6"	\$20.00	<b>Available end of June</b>
------------------------------	-----	------	---------------------------	--	----	---------	----------------------------------
