|----------------------------------|-------|---|--|---|-------|-------------------|-----------------------------|-------------------|-----------------------------|-------------------|---------------|
| BANANAS | | ##### | | | | | | | | | |
| MUSA 'DWARF GREEN'. [Cavendish] | 6-8 | 9-11 | CREAMY ORANGE PULP FRUIT | Musa 'Dwarf Green' is a sturdy plant with extremely thick leaves, which may be used for wrapping and grilling meat, as well as serving food. They also make this cultivar very wind tolerant. This is a Cavendish type banana that produces a creamy orange pulp fruit. | 3 Gal | \$30.00 | 5 Gal Multiple shoots | \$40.00 | 8 Gal Multiple shoots | \$60.00 | |
| MUSA 'DWARF IHOLENA' [Cavendish] | 6-8 | 9-11 | RARE WITH WONDERFUL TASTE-CREAMY ORANGE PULP FRUIT | Rare with a wonderful taste, Musa 'Dwarf Iholena' is a sturdy plant with extremely thick leaves, which are used for wrapping and grilling meat, as well as serving food. They also make this cultivar very wind tolerant. A Cavendish type banana that produces a creamy orange pulp fruit. | | | 5 Gal Multiple shoots | \$40.00 | 8 Gal Multiple shoots | \$60.00 | |
| MUSA 'DWARF ORINOCO' [Cavendish] | 5-6 | 7b-11 | SUITABLE FOR DESERT OR COOKING | The 'Dwarf Orinoco' is a small vigorous plant that is solid green and has a thick stem. It is a heavy bearer of thick skinned fruit of very good eating quality. There is very little curvature to the fruit and the fruit can ripen on the plant without splitting. 'Dwarf Orinoco' versatility make them popular in many regions of the world. The plant is hardy and withstands cold temperatures and wind, but may be supported when carrying large heads of fruit. | | | 5 Gal Multiple shoots | \$40.00 | 8 Gal Multiple shoots | \$60.00 | |
| MUSA 'LACATAN' [Burro] | 5-9 | 8-11 | CLAIMED TO BE THE BEST TASTING BANANA. | Desirable for desert bananas because of their sweet taste, aroma, and firm texture when ripe. They are preferred to Cavendish varieties in their native region of the Philippines. Claimed to be the best tasting banana. Harvest fruit in 8 to 12 months. | | | 5 Gal Multiple shoots | \$40.00 | 8 Gal Multiple shoots | \$60.00 | |
| CARAMBOLA | | Carambola are small symmetrical trees that fruit very prolifically. They are commonly eaten fresh, in salads, as garnishes and in drinks. The fruit have a sweet citrus-like flavour that is both delicious and refreshing. | | | | | | | | | |
| AVERRHOA carambola 'KARI' | 9'X6' | 9-11 | STAR FRUIT | A Hawaiian selection very similar to the Sri Kembangan but with fewer seeds. Aug-march | | | 5 Gal | \$75.00 | | | |
| CITRUS | | | | | | | | | | | |
| LIME | | | | | | | | | | | |
| KEYLIME (KEY LIME-MEXICAN) | 6-8 | 9-11 | | The colour varies from dark green when immature to a yellowish green when ripe. All green lime types turn fully yellow when mature and soon thereafter drop from the tree. To avoid confusion with lemons limes are collected when still green. The Mexican lime is at its juiciest and best medium ripe, when still partly green. If it is allowed to mature on the tree it loses some of its typical flavour and becomes less juicy. This is the Key lime of food recipes. Both the juice and the rind oil of Mexican lime have an inimitable and unique lime flavour. | 2 Gal | \$70.00 | | | | | |
| PUMMELO/GRAPEFRUIT | | | | | | | | | | | |
| OROBLANCO PUMMELO HYB | 6-8 | 9-11 | | 1980. Mid winter, Triploid Oroblanco produces sweet seedless fruit even in areas of low summer heat. Huge, intensely fragrant flowers and attractive glossy foliage. The fruit has a smooth greenish-yellow rind, which is thicker than a typical Grapefruit. Holds well to the tree, stores well. | 2 Gal | \$70.00 | | | | | |
| ORANGE | | | | | | | | | | | |
| WASHINGTON NAVEL | 6-8 | 9-11 | | The large exceptionally delicious round seedless fruits are rich in flavour and have a slightly pebbled orange rind that is easily peeled. Early in maturity, 10 mths, at its best in the late autumn to winter months, but will hold on the tree for several months beyond maturity and stores well. The fruit was medium yellow and had a thick rind that came off easily. The segments are seedless, loose, very juicy and very sweet. The sugar to acid balance was on the sugary side but had enough acids to make a pleasing citrus flavour. The texture was firm but melting. All in all one of the best oranges to eat fresh. | 2 Gal | \$70.00 | | | | | |
| ENGLISH WALNUTS | | | | | | | | | | | |
| JULGANS regia CARPATHIAN | 50-60 | 5-10 | THIN SHELLED WITH HIGH QUALITY FULL BODIED FLAVOUR | A close relative of Black Walnut, the English Walnut is also known as Carpathian and Persian. Originally from ancient Persia most seedlings were brought to North America by European Settlers, When fully dormant they are just as hardy as Black Walnuts and have survived -40'. Fluctuating Spring temperatures with a late Spring frost can cause damage. Preferred for their high quality, full bodied flavour and thin shells. | 1 Gal | \$30.00 | | | | | |

| FIG | | ##### | | | | | | | | | |
|-----------------------------------|------|-------|---|--|-------|-------------------|-------|-------------------|------|---------|--|
| FICUS 'BEERS BLACK' | 4-12 | 6b-10 | SMALLER BLACK FRUIT, EXCELLENT FLAVOUR | Medium sized with outstanding distinct sweet flavour, excellent either fresh or dried. A reddish pink interior and a violet skin. Rated to zone 7 and potentially to zone 6, so many homes can enjoy growing this cultivar outdoors year round. | 1 Gal | \$20.00 | 2 gal | \$30.00 | 3gal | \$45.00 | |
| FICUS 'BLACK MISSION' | 4-10 | 7-11 | PREMIUM FIG, WONDERFUL FLAVOUR. 2 CROPS | One of the most well known figs in cultivation (since 1769). It is known for its blackish-purple skin with a strawberry coloured centre. 'Black Mission' Fig has a wonderful flavour that is very distinct. These delicious high sugar figs are superb either fresh or dried. Also good for canning. 'Black Mission' produces a heavy first crop (breba) in early summer and then its main crop in Fall. This fig is a very vigorous grower. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |
| FICUS 'DESERT KING' | 4-8 | 7-10 | HIGH QUALITY, YELLOW SKINNED FRUITS JULY TO FALL | A large, sweet, high quality delicious, greenish yellow fig with rich, reddish purple flesh. This San Pedro type cultivar has a very good breba crop (first crop), the second crop is not as good in quality as the first. The pulp is sweet and delicious either fresh or dried. This particular cultivar should not be pruned severely. This highly vigorous tree originated in Madera, California around 1920. One of the best for container growing. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |
| FICUS 'GE NERT' | 6-10 | 7-9 | MAYBE THE LARGEST AND SWEETEST ITALIAN OUT THERE! | Extremely large fruit, Purple skinned. Easy to grow. An Italian fig, add this rare variety to your collection and bring delicious, sweet flavour to your kitchen! Does not tolerate excessively wet soil, but needs ample moisture during fruiting. | | | 2 gal | Temp out of stock | | | |
| FICUS 'ISCHIA' | 4-10 | 7-11 | YELLOW SKINNED EXCELLENT FLAVOUR JULY AUGUST | An excellent, medium sized, sweet, green to greenish yellow, thin skinned fig with red flesh that resembles a strawberry when peeled. These are especially attractive when used in a fruit salad. It is recommended for areas with short summers. This cultivar offers much to the home gardener. It is small in ultimate size, so even small yards can contain one without difficulty. It bears from mid-season till late in the season to extend the harvest and the quality is excellent. The figs possess a fine, excellent flavour either fresh or dried. Due to its fairly well closed, small eye, they are resistant to spoilage by either weather or insects. Originally from Spain, it makes a small tree when mature and is one of the best to grow in containers. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |
| FICUS 'LATTARULA' | 4-8 | 7-10 | ITALIAN HONEY FIG YELLOW SKIN 2 CROPS | A very big, sweet, long bearing, lemon green fig with honey coloured flesh. It is excellent during dry harvest seasons but will have some spoilage during exceptionally wet or humid weather. It is very good dried or for eating fresh and when the fruit is "right", it is unsurpassed! Produces an abundance of fruit twice a year. A great selection for container culture too. | 1 Gal | Temp out of stock | | | | | |
| FICUS 'OLYMPIAN' | 4-8 | 6-10 | VERY SWEET, THIN SKINNED PURPLE FRUIT | Won the Retailers' Choice Award at the 2014 Far-West Show! 'Olympian' is an ultra cold hardy fig & absolutely delicious. This fig produces very sweet fruits with thin purple skin with a red to violet flesh. A unique heirloom variety, good size for container growing. If pruning is necessary, do after harvest. | 1 Gal | Temp out of stock | | | | | |
| FICUS 'TEXAS EVERBEARING' | 4-10 | 7-11 | LARGE SWEET AND NEARLY SEEDLESS | Everything is bigger in Texas, so they say. This Fig follows that by producing a good, large, (sometimes 2" in diameter) sweet, brownish yellow, bell shaped fig with a long fruiting season. The flesh is strawberry coloured, nearly seedless and delicious. It bears at an early age and gives a good crop even in cool, short summers. The second crop matures early and is even heavier than the first. The tree is very hardy and even if frozen to the ground, it will usually bear on the new sprouts that same year. Stays shorter in containers, a great feature for patio edibles. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |
| FICUS 'WHITE MARSEILLES' | 4-10 | 7-11 | YELLOW WHITE FRUIT. THOMAS JEFFERSON'S FAVOURITE FIG | A fairly hardy, large, lemon coloured, thin skinned fig with tender, white to light amber flesh. They are very sweet and have a high sugar content. An old, (pre 1769) reliable variety, this fig is excellent in all respects and a favourite of Thomas Jefferson. Produces a small breba crop. They will split if watered too much while ripe. This slow growing, dense tree is well adapted to containers. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |
| FICUS 'VIOLET DE BORDEAUX' | 3-5 | 6-10 | DELIGHTFULLY SWEET PURPLE FRUIT TWICE A YEAR | Discovered about 1680 in Versailles (thought to be originally from Spain) this hardy cultivar produces large, almost black fruit with very deep red pulp. The flavour is rich and delightfully sweet. Producing two crops per year; breba fruit are pyriform with thick, tapering necks, the main crop fruit are spherical often without necks. Excellent fresh or dried but probably needs heat to develop the best flavour. This dwarf and prolific cultivar is considered by some to be the very best tasting fig around. | 1 Gal | \$20.00 | 2 gal | \$30.00 | | | |

| GINGER | | | | | | | | | | | |
|----------------------------|-----|------|---------------------------|---|----|-------------------|--|--|--|--|--|
| ZINGIBER OFFICINALE | 2-4 | 8-11 | EDIBLE GINGER ROOT | This is a great selection of edible yellow ginger root that produces rhizomes quickly. These rhizomes can be dug as soon 4-6 months in ground or from a container. Store bought ginger root is mature, fibrous, & extra spicy. "Baby Ginger", which is harvested juvenile, is becoming more and more popular in the culinary arts. It is more mild, tender & does not need to be peeled. The shelf life is about 1-2 weeks at room temperature. This makes it an ideal plant to have in the home garden/container, where it can be harvested fresh as needed. | 6" | Temp out of stock | | | | | |

| JAKFRUIT | | ##### | | | | | | | | | |
|--|-----|-------|-----------------|---|--|--|-------|---------|--|--|--|
| ARTOCARPUS heterophyllus 'J-31' | 6-8 | 9-11 | MAY-JUNE | Open, spreading, fast growth habit. Early season producer; tree easily pruned to maintain small tree (~8 ft). Deep yellow fruit that is firm. Sweet rich flavour, earthy aroma. Fruit rarely splits and has excellent texture. Fruit size 12kg (26lb). Tree of 6-8' can produce 40-60kg per year. | | | 3 Gal | \$75.00 | | | |

| KIWI | | Indoor or outside . If container grown bring inside for fall harvest. | | | | | | | | | |
|---------------------------------|------|---|---------------------------------|--|-----------------|---------|-----------------|---------|--|--|--|
| ACTINIDIA arguta 'ISSAI' | 4-10 | 6-9 | SELF FERTILE, HARDY KIWI | The only self-fertile hardy kiwi, is less vigorous than other kiwi's which enables it to be grown in gardens with limited space. This has been known to fruit in its first year. Blossom in Spring-fall fruiting. Bite sized 'fuzz' free fruit mature September-October. As a patio plant, requires support, set outside during the summer and move indoors in the winter. | 1 Gal on Bamboo | \$25.00 | 2 gal on Bamboo | \$35.00 | | | |

| LONGAN | | The Longan is a very close relative of the Lychee. The fruit are typically the size of a quarter, and they have a brown leathery shell that contains what looks like a peeled grape with a single seed. The fruit are sweet, with a pleasant aroma, and they taste like a nutty grape. | | | | | | | | | |
|--|--------|--|--|---|--|--|------|---------|--|--|--|
| DIMOCARPUS longana 'BIEW KIEUW' | 10'X8' | 9-11 | | A variety from Thailand that is well suited to the subtropics as it requires cool winters to flower well. This variety is a consistent, heavy cropper with good quality fruits. July-Sept | | | 3gal | \$75.00 | | | |

| LYCHEE | | | | |
|-------------------------------|----------|------|--|---|
| LITCHI chinensis 'SWEETHEART' | 10' x 8' | 9-11 | | Hands down the finest Lychee. It is a consistent producer of huge heart shaped fruit all having chicken tongue seeds. Production is close to that of Mauritius inspiring growers targeting high-end produce markets and gourmet restaurants. It is quickly becoming the choice by home garden growers for its reliability and superior quality. June-July |
| | | | | 3gal \$75.00 |

| OLIVE | | | | |
|---------------------------|-----|-----|--|--|
| OLEA europaea 'ARBEQUINA' | 2-8 | 7-9 | 3-4' CONTAINER GROWN TREE SHOULD HAVE 300+ OLIVES PER YEAR | Bring a taste of the Mediterranean to your home. This variety is revered as both a table olive – for its mild, buttery and lightly fruity flavour – as well as an oil olive for one of the highest concentrations of healthy, antioxidant-rich oils. Even a small tree can produce 20lbs (8kgs) of Olives. Tasty fruit and gorgeous gray-green foliage will evoke the rolling Spanish landscapes where this variety is widely grown. Olives hang well on the tree and ripen at different intervals. Drought and Heat tolerant and pest-resistant. Ripens starting in November. Self-pollinating, but bears better when cross pollinated by Manzanillo. Can be kept smaller by pruning. Plant these warm-weather plants in containers so that you can move them indoors before freezing temperatures arrive. Semi-deciduous, meaning they will drop leaves in extreme cold. Need 200-300 chill hrs (below 50°F 10°C) for best fruiting. |
| | | | | 1 Gal \$25.00 |

| PASSION FRUIT | | | | |
|-----------------------------------|-------|------|-------------------------------|--|
| ##### | | | | |
| PASSIFLORA edulis 'POSSUM PURPLE' | 12-12 | 9-11 | FRUIT THE SIZE OF A GOOSE EGG | This amazing passion flower not only produces delicious, sweet purple fruit about the size of a Goose egg, it also has attractive frilly-edged flowers that Passiflora are known for. It is self-pollinating with fruit appearing effortlessly and will fruit in a 10" pot. A strong vigorous grower that with a little encouragement makes a fine hanging basket. Periodically just wrap the wandering vines around the basket and in no time fruit will be dangling from the dark green leaves. Give full sun for best performance. Aug-Nov. |
| | | | | 1 Gal on Bamboo \$25.00 3 Gal on 6' Trellis \$60.00 |

| PINEAPPLE | | | | |
|---|-----|------|---|--|
| Ananas are easy to grow, drought tolerant plants. Although they are not very cold tolerant they can be overwintered indoors as a house plant. The plants will fruit in a container. All self-fertile. | | | | |
| ANANAS 'FLORIDA SPECIAL' | 1-3 | 9-11 | GOLDEN HIGH FLAVOURED FLESH SPINELESS | Bred for Florida pineapple production by Libby fruit company. Florida Special Pineapple produces a golden-fleshed fruit with great flavour. Ripening fruit has shown to take temperatures down to the mid 30's without internal damage. Leaves are spineless! |
| ANANAS 'SUGARLOAF' | 1-3 | 9-11 | UNUSUALLY SWEET AND EDIBLE CORE 5-6lb FRUIT SERRATED LEAF | Like Eating Honey! Sometimes called White Sugarloaf or Kona Sugar Loaf, this pineapple variety has smooth leaves and an edible core! Fruit is white with a high sugar content but low acid. |
| ANANAS 'WHITE JADE' | 1-3 | 9-11 | SWEETEST HAWAIIAN OUT THERE, 100% EDIBLE CORE SPINELESS | Most highly sought after Hawaiian variety. The white fleshed fruit is ultra sweet, with very low acidity. The core is 100% edible too! The beautiful blue grey leaves are spineless which makes handling much more enjoyable. Best suited for backyard container gardens. 'White Jade' will produce a tasty reward far better than anything found in the grocery store for those who plant them. |
| | | | | 1 Gal \$28.00 2 gal \$32.00 |
| | | | | 1 Gal \$29.00 2 gal \$33.00 |
| | | | | 1 Gal \$29.00 |

| POMEGRANATE | | | | |
|---------------------|-----|------|--|--|
| PUNICA 'PARFYANKA' | 4-8 | 7-10 | A SEMI-DWARF VARIETY THAT GROWS LARGE AND DELECTABLY DELICIOUS FRUIT WITH A SOFT SEED. | Originally imported from Dr. Gregory Levin at the Garrigala agricultural station in Turkmenistan. The fruit is quite large and highly coloured in beautiful bright red. The arils are large and bright red with a very small, soft, edible seed. The fruit is of the highest quality. 100 to 200 chill hours. Self fertile. Also called Parfianka and Garnet Sash. Zone 7 - 9. (warm 6 perhaps). |
| PUNICA 'SALAVATSKI' | 4-8 | 6-9 | COLD HARDY RUSSIAN VARIETY, LARGE DELICIOUS FRUIT SELF FERTILE | A deciduous, most cold-hardy pomegranate tree. Produces beautiful red flowers in summer and large orange skinned with red arils delicious fruits in early fall. - perfect for juice, tea, and even desserts * self-pollinating and dwarf-sized, so you don't need much space. One of the healthiest fruits you can grow! Now, you can grow an endless supply of sweet super-food! The Toughest Pomegranate Variety, it has survived temperatures to -6F or -21C. It is native to the extremely cold regions of Russia/Afghanistan. Can be container grown indoors. Requires 200 chill hours. |
| | | | | 1 Gal \$25.00 |
| | | | | 1 Gal \$25.00 |

| SUGAR CANE | | | | |
|-------------------------|------|------|------------------------------|--|
| SACCHARUM 'OFFICINARUM' | 8-12 | 9-10 | EDIBLE, THE REAL CANDY CANE! | Saccharum 'officinarum', is a large tufted perennial grass that is probably native to Southeast Asia. It can grow to 15-20' tall in it's native environment, but to 5-8' tall more commonly when grown indoors. Stems contain a sweet juice that may be extracted for production of sugar or molasses. |
| | | | | 2 Gal Temp out of stock |
